

Inspection Programs

Michael Johnson

Deputy Executive Director for Reactor
and Preparedness Programs

Session Format

This session will be an opportunity for panelists to describe how their organizations conduct regulatory oversight of nuclear security through inspections, assessments of performance, and enforcement.

Panel Participants include:

- Petr Krs, Czech Republic
- Fredric Lall, India
- Martua Sinaga, Indonesia
- Boris Krupchatnikov, Russia

Session Format (cont.)

Questions & Answers

- Please write your questions on the cards provided; panelists will have the opportunity to respond following all of the presentations

Key Questions About Inspection Programs

- Are inspection-program goals and objectives clear and appropriate?
- With respect to the regulatory framework, does the inspection program comprehensively address primary objectives of nuclear security?
- Does the inspection program appropriately consider the interface of safety and security to ensure safe operation of the facility?
- Is the inspection program periodically evaluated and updated for continued effectiveness?

Key Session Topics (NRC Perspective)

- **Oversight of Regulatory Requirements Through Inspection**
- **Assessment of Performance**
- **Enforcement**
